

## GROOVY GARDEN COMPANY

Congratulations on your purchase of a homemade Groovy Garden Company bird box. Our boxes have been designed to provide a decorative addition to your garden whilst encouraging and supporting British birdlife.

Over 60 species of birds found in Britain are known to have used bird boxes to supplement their natural nesting places. Gardens can provide ideal sources of food but there may not be anywhere to nest, so putting up a box is the ideal solution. Our standard size boxes have a 38 mm diameter hole which is suitable for many species and specifically for the declining house sparrows and starlings.

The best spot for siting your box is pointing between N and E to avoid the worst of the weather and should be fixed above 2 m high. We have supplied a metal fixing for the back which will enable the box to hang on a nail or screw or you can string it on some wire or rope around a tree.

We hope you enjoy your Groovy Garden Company box and the birdlife it brings to your garden.
