

GROOVY GARDEN COMPANY

Thank you for purchasing from our unique Groovy Garden Company oak barrel staves collection.

Whiskey barrels have a short shelf life and we take the old oak staves and make fabulous recycled products. Each stave has its own unique shape and therefore its own individual character as no two are the same even if it's from the same barrel. Rather than just being ordinary planter or water butt we think we have produced a range of alternative and stylish uses for this fantastic wood.

To keep the wood looking at its best we recommend a light polish with some furniture wax every so often to prevent the wood drying out and to bring out the natural shine. All our products will have maximum lifespan if kept inside and we suggest that if furniture is left outside it is covered in the worst weather.

We hope you enjoy its new life in your home!
